

## DELHI PUBLIC SCHOOL, GANDHINAGAR

Academic session 2020-21

### Event Report

<b>Title : Activities of the month</b>	<b>Date: September</b>
<b>Venue: OVC</b>	<b>Class: UKG</b>

Academic activities always enrich and help students to self-analyse .Various fun filled activities were conducted for the students of UKG in the month of September. For English subject, an activity on family words with clay was conducted. They enjoyed forming different 'a and e'- family words using clay. Playing with clay develops fine motor skills along with eye-hand coordination.

A word wall activity was conducted for them in which students were asked to frame two and three letters using alphabet cards. This activity helped them in developing their thinking skills. A word mat activity was conducted. Students were asked to keep ready their word mat and coins or caps of the bottle. During the class, teacher was reading a word and children were hiding that particular word using coins. Children were also told to look for the rhyming words and word, for the jumbled letters.An activity related to numbers and number names was conducted. Through this activity they learned to recognise numbers and wrote number names.

Students engrossed themselves in the germination activity. It was a fantastic experience for them as it was simple, relatively quick process and easy to observe. As we used a transparent plastic glass for germination it was easy for our little ones to see and understand what really happens under the soil.It gave them the opportunity to watch how seeds grow into a big plant and what do they need to grow.

Children enjoyed a lot as they were fully engrossed in all the playful activities
