

DELHI PUBLIC SCHOOLGANDHINAGAR

Academic Session 2023-24

Activity Report

Title: LEARNING MATHS WITH ABACUS	Date: 21-04-2023
Venue: Classrooms	Class: III (A to H)

About the Event

Maths is nothing less than a game that polishes intelligence and boosts concentration. With the right attitude, friends and teachers, doing math can be entertaining and delightful. To make Maths more interesting an Abacus activity was conducted for Class III students.

The Objectives of the Event

- ◆ To develop a good understanding of place value and order, including reading and writing numbers.
- ◆ To develop and encourage logical thinking.
- ◆ To appreciate the usefulness, power and beauty of Maths.

The Event & Participation

DPS Gandhinagar always strives hard to make learning more interesting for our students, with this aim; Maths Department conducted an Abacus activity on April 21, 2023, for Class III students to master core concepts of Maths with fun.

Teachers instructed the students to bring an abacus, pencil colours and bindis and with the help of these materials, students made the Abacus and showed the place value of the given number by pasting colourful and bright bindis in their scrapbook. This activity helped the students arrange the numbers in the correct order and read and write numbers and number names accurately. Students took a lot of interest in completing this activity.

A few glimpses of the Activity can be seen in the pictures below.
